

Power Door Mirror

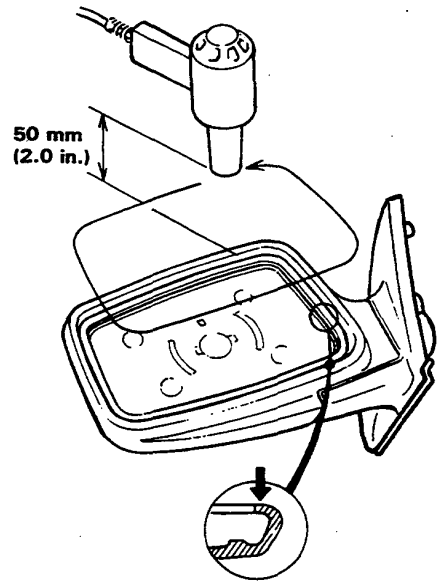

Removal

1. Remove the door panel and disconnect the power mirror connector.
2. Pry out the cap with a flat-tip screwdriver and remove the screw, then remove the cover panel.
3. Remove the two clips and turn over the lower weatherstrip until the mirror mounting screws are visible.
4. Remove the mirror mounting screws while holding the mirror.

Mirror Glass Replacement

1. Heat the edge of the glass with a low powered heat gun for several minutes, then remove the glass.

2. Install the glass in the mirror case, narrow end first.
