

Rear Bumper

Replacement

1. Disconnect the two license light wire connectors.
2. Remove the 3 bumper mount screws on each side at the corner edge of the bumper.
3. Remove the 2 bumper lower mount nuts from under the trunk floor.
4. Remove the 2 bumper upper mount nuts from the trunk area.
5. Remove the bumper by sliding it to the rear.

NOTE: Do not damage the threads of the bumper bolts.

If necessary:

6. Remove the screws and nuts, then remove the rear under spoiler.
