Bleeding

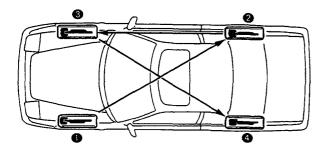

CAUTION:

- Use only clean Brake fluid.
- Make sure not dirt or other foreign matter is allowed to contaminate the brake fluid.
- Do not mix different brands of brake fluid as they may not be compatible.
- Do not spill brake fluid on the car, it may damage the paint; if brake fluid does contact the paint, wash it off immediately with water.

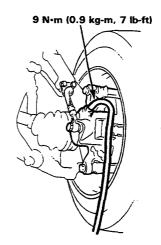

NOTE: The reservoir on the master cylinder must be full at the start of bleeding procedure, and checked after bleeding each wheel cylinder. Add fluid as required. Use only DOT 3 or 4 brake fluid.

BLEEDING SEQUENCE

- Have someone slowly pump the brake pedal several times, then apply steady pressure.
- Loosen the brake bleed screw to allow air to escape from the system. Then tighten the bleed screw securely.
- Repeat the procedure for each wheel in the sequence shown above, until air bubbles no longer appear in the fluid.
